

+ MR TRAMPOLINE

Please answer the following questions based on which frame style you have:

Wiggly Bar Frame

A: Internal length of frame
Distance between wiggly bar and wiggly bar

B: Internal width of frame
Distance between wiggly bar and wiggly bar

NOTE: If your frame is bowed because the springs are not pulling it square, then be sure to measure the width nearer the corners.

Drilled Hole Frame

A: Internal length of frame
Entire width of frame, spring hole to spring hole

B: Internal width of frame
Entire width of frame, spring hole to spring hole

NOTE: If your frame is bowed because the springs are not pulling it square, then be sure to measure the width nearer the corners.

C: Length of string bed

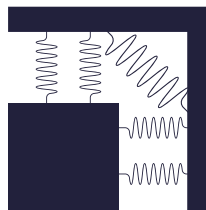

Distance between the longer, outer edges of the trampoline bounce mat area. String end to string end.

D: Width of string bed

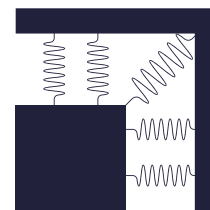

Distance between the longer, outer edges of the trampoline bounce mat area. String end to string end.

Corner Style:

Standard Corner

Non-Standard Corner

Number of springs:

Long Side:

Short Side:

Length of springs:

Including hook on end. Make sure spring is fully closed, not stretched.
